## **The Association of Directors of Public Health Statement on the Effectiveness of the Family Nurse Partnership**

A study, conducted by Cardiff University, has been published in [The Lancet](#). It provides new evidence on the effectiveness of the Family Nurse Partnership (FNP) in England, an NHS service working to support vulnerable teenage mothers-to-be, pregnant with their first child. The study found it was not a cost effective model of providing a targeted intervention.

The Family Nurse Partnership (FNP) is a licensed intensive home-visiting intervention, originally developed in the USA and introduced into practice in England, that involves up to 64 structured home visits from early pregnancy until the child's second birthday by specially recruited and trained family nurses.

ADPH welcomes this research as adding to the evidence base on interventions to improve the health and wellbeing of children and their families. As commissioners of 0-19 public health nursing services, local authorities will wish to consider this new evidence in their commissioning plans going forward.

### **Further Information**

For further information please contact Rasal Sesay, ADPH Policy Administrator on 020 7832 6945 or [rasal.sesay@adph.org.uk](mailto:rasal.sesay@adph.org.uk).

For interview requests please contact Enquiries at [enquiries@adph.org.uk](mailto:enquiries@adph.org.uk).

### **Notes to Editors**

1. The Association of Directors of Public Health (ADPH) is the representative body for Directors of Public Health (DsPH) in the UK. It seeks to improve and protect the health of the population through DPH development, sharing good practice, and policy and advocacy programmes. [www.adph.org.uk](http://www.adph.org.uk)
2. ADPH has a strong track record of collaboration with other stakeholders in public health, including those working within the NHS, local authorities and other sectors.
